9. ☐ Other _____.

1. The following is an examiner's statement of reasons for allowance: The claims have been allowed because claims 1 and 6 recite a pharmaceutical tablet dispensing and packaging system having a tablet packaging unit. There is a first tablet-dispensing unit 14 where first tablet cassettes are installed through the front portion of the first tablet-dispensing unit to selectively release the tablets through the rear portion of the first tablet dispensing unit and into the tablet-packaging unit. There is a plurality of vertical dividers formed on the rear portion to provide a plurality of vertical grooves. There is a second tablet dispensing unit 16 shaped in a mirror image to the first tablet dispensing unit and hinged side wise to the first tablet dispensing unit. When the dispensing units 14,16 are hinged closed, there is a plurality of spatial shafts formed by the corresponding grooves of the dispensing units and which serve as downward channels through which the tablets fall toward the tablet packaging unit. Claim 6 further recites a front cabinet disposed on top of the tablet packaging unit. The closest reference to Kim shows in figure 9 tablet dispensing units 16,16' or 14,14' that are hinged together and have a type of guide for the tablets of each of the tablet dispensing units. There is no disclosure for forming a plurality of spatial shafts by corresponding grooves from each of the tablet dispensing units when the tablet dispensing units are hinged in a closed position. The reference to Campoli is cited as art of interest showing in figure 3 the hinged dispensing units 21 to dispense the articles through the opening 20.
